

YOUR STROWGER AUTOMATIC EQUIPMENT is tested for your service

Just before it is shipped, your Strowger Automatic telephone equipment proves its fitness for your specific service. Each unit is put through its paces under conditions as close as possible to those in your exchange. Strowger *must* pass these tests with flying colors before it is tagged "OK to ship."

To make these tests, Automatic Electric process engineers have devised testing equipment which reproduces the varied circuit conditions in your telephone service. The performance of the switches is carefully checked under the most unfavorable conditions that will be encountered in actual operation.

This is only the last in a series of many tests which are made at every step in the production of Strowger Automatic telephone equipment. They are your assurance of long wear and dependable service when you choose Strowger!
