

REFERENCE  
2503-TYPE TELEPHONE SETS  
IDENTIFICATION AND CONNECTIONS

1. GENERAL

1.01 This section contains information for the 2503C manufacture discontinued (MD) and 2503CM (modular) (Fig. 1) telephone sets. Refer to Section 502-500-110 for common maintenance information for 0- and 1-button telephone sets.

1.02 The reasons for reissuing this section are listed below. Revision arrows are used to emphasize the more significant changes.

- Add the 641E jack
- Add the D-180896 Kit of Parts (polarity guard)
- Show the 819040528 (P-90D052) guard assembly MD.

2. IDENTIFICATION

2.01 The 2503-type telephone sets are desk sets intended for use in conjunction with other equipment to provide DATAPHONE® data communications service.

2.02 **The 2503CM:** With the exclusion key nonoperated (normal position) this telephone set may be used with the J1D402B data set to provide data service with monitoring of computer-generated voice replies. With the exclusion key operated (up position) the set provides regular telephone service. To deactivate monitoring feature, refer to Fig. 3, Note 4. To use the telephone set to provide data set

control with the exclusion key operated, refer to Table A.

2.03 **The 2503C (MD):** With the exclusion key operated (up position) this telephone set may be used with the J1D402B data set to provide data service. With the exclusion key nonoperated (normal position) the set provides regular telephone service.

**Note:** The relationship of features to exclusion key differs in the 2503C (MD) and 2503CM telephone sets.

2.04 These telephone sets are used in Data Access Arrangements (DAA) where the customer-owned equipment is connected to the DDD network through a coupler. Figure 2 and 3 provide connection information on the 2503C (MD) and 2503CM telephone sets. The 2503CM is a modular set which is shipped with a G15A handset but without the H4DU handset cord or the D8AA mounting cord, **which must be ordered separately.**

2.05 For application of these telephone sets, refer to Division 590.

2.06 Table B lists replaceable components for these sets.

2.07 When a polarity guard is required with these sets, install the D-180896 Kit of Parts (guard assembly) or the 819040528 guard assembly (MD) as shown in Table C. Polarity guards should be installed only when authorized by local instructions to prevent battery and ground reversals encountered in end-to-end signaling installations.

NOTICE

Not for use or disclosure outside the  
Bell System except under written agreement
