

870A1M TELEPHONE SET
"TOUCH-A-MATIC®" REPERTORY DIALER

1. GENERAL

- 1.001 This addendum supplements Section 530-300-100.
- 1.002 It provides information on the Ault 306-1001 Power Unit which is used when a *Touch-A-Matic* dialer is connected to a 4A speakerphone. Use of the Ault 306-1001 power unit eliminates the necessity for providing separate 85B1 and 95B1 power units.
- 1.003 The Ault 306-1001 power unit provides two separate outputs. The first is equivalent to that of the 85B1 power unit (18 Vac) used with the 4A speakerphone. The second output is equivalent to the 95B1 power unit (14 Vac) used with the *Touch-A-Matic* dialer. The Ault 306-1001 is approximately the same size (3 inches high, 2-1/2 inches wide, and 1-3/4 inches deep) as the 85B1 or the 95B1.
- 1.004 The Ault power unit requires the same installation procedures as those outlined for the 85B1 or the 95B1 power units.
- 1.005 The Ault 306-1001 power unit is available from the Regional Supply Centers. Order as follows:
- (Qty) Unit, Power, Ault 306-1001
