## Features

- **Designed Exclusively** for Electronic Modular Switching Systems except KX-T616 and KX-T616D.
- **LCD Readout** shows date, time and call duration. HELP screen-style 16-digit display helps you program system features.
- **Auto-Answer Speakerphone** lets you set intercom for automatic “hands free” answering. Also allows on-hook dialing.
- **12 Soft Buttons (Programmable Feature)** for one-touch access to system features such as automatic call-back and paging. Can also store numbers for automatic dialing.
- **Call Transfer** switches either outside or internal calls to another extension.
- **Call Forwarding** automatically re-routes door intercom and internal and external calls to a different extension.
- **CO Line BLF** indicates status of each CO line and lets you connect to a CO line by pressing a CO line button.
- **Power Failure Protection** lets you make and receive calls on extensions 11–16 during power failures.
- **Optional Headset** combines the privacy of a handset with the hands free operation of a speakerphone.

# Troubleshooting Guide

## Problem

## Cause & Remedy

**The unit does not ring.**

Ringer Volume Selector is set to "OFF". Set to "HIGH" or "LOW".

**The unit does not operate during power interruption.**

The unit is used as extension 17 through 26. Use another KX-T61630/KX-T61631 which is used as extension 11 through 16 and switch the POWER FAILURE switch to "ON". Then the unit can be used as a standard telephone.

**The unit does not operate in spite of using the optional headset KX-T30890.**

The HANDSET/HEADSET selector is set to "HANDSET". Switch the selector to "HEADSET".

**System programming can not be done into the KX-T61610.**

You may have programmed without using an extension 11. The system programming can be done by using an extension 11 only.

**I have transferred a call to the different party by mistake.**

Press the CO or ICM button whose indicator is flashing slowly to retrieve the call, then repeat the procedure of Call Transfer.

**Power failure does not take place but the unit does not operate except in manual dialing and receiving.**

The POWER FAILURE switch may be set to the ON position. Change the switch to the OFF position.

**I placed a call on hold and hung up once, then seized a line and tried to place a call on exclusive hold, but I can not.**

Retrieve a call once and place a call on exclusive hold again.

# Connection to Telephone Line

The KX-T61630 may be connected to a telephone line. But will only operate in Manual Dialing and Receiving.

- In this case, if you are required from the telephone company, inform the followings.
  - FCC Registration No; . . . . .
  - .... (found on the bottom of the unit)
  - Ringer Equivalence; . . . . . 1.0 B
  - The particular line to which the equipment is connected.
- Do not use any handset other than Panasonic handset for model KX-T61630 use.
- This unit must not be connected to a coin operated line. If you are on a party line, check with your local telephone company.
- **Ringer Equivalence Number (REN):**  
The REN is useful to determine the quantity of devices you may connect to your telephone line and still have all of those devices ring when your telephone number is called. In most, but not all areas, the sum of the REN's of all devices connected to one line should not exceed five (5.0). To be certain of the number of devices you may connect to your line, as determined by the REN, you should contact your local telephone company to determine the maximum REN for your calling area.

## Power Failure

In the event of a power failure, each CO line will be connected to assigned extension if the KX-T61630 is used as an extension 11, 12, 13, 14, 15 or 16.

CO 1 will be assigned to extension 11  
CO 2 will be assigned to extension 12  
CO 3 will be assigned to extension 13  
CO 4 will be assigned to extension 14  
CO 5 will be assigned to extension 15  
CO 6 will be assigned to extension 16

In this case, set the POWER FAILURE switch to "ON".

If dialing cannot be done, switch the DIALING MODE selector to the other position ("PULSE" or "TONE").

# Wall Mounting

This unit can be mounted on a wall phone plate.

## To rotate the handset guide for wall mounting

1. Pull up in the direction of arrow (A).
2. Set by rotating as shown.

4. Mount the unit to the wall phone plate then seat securely by hooking as shown in Fig. 5.
5. Connect the cord to the telephone line jack.

To temporarily place the handset down during a conversation, hook as shown.

## To mount the unit on a wall phone plate

1. Remove the rest by pulling in the direction of the arrow (B) while pushing the two snap tabs simultaneously in the direction of the arrow (A), as shown in Fig. 3.
2. Insert the hooks of the rest into the hole of the unit then replace the rest by pushing it in the direction of the arrow (C), as shown in Fig. 4.
3. Connect the telephone cord to the unit.

- When you want to connect the unit to a wall phone plate using a short telephone cord, have a house-wiring installed by the telephone company or a qualified installer, purchase a short telephone cord of 4-conductor and connect the cord to a wall phone plate.

# Important Information

In the event terminal equipment causes harm to the telephone network, the telephone company should notify the customer, if possible, that service may be stopped. However, where prior notice is impractical, the company may temporarily cease service providing that they:

**This telephone provides magnetic coupling to hearing aids.**

- (a) Promptly notify the customer.
- (b) Give the customer an opportunity to correct the problem with their equipment.
- (c) Inform the customer of the right to bring a complaint to the Federal Communication Commission pursuant to procedures set out in F.C.C. Rules and Regulations Subpart E of Part 68.

The Telephone Company may make changes in its communications facilities, equipment, operations or procedures, where such action is reasonably required in the operation of its business and is not inconsistent with the rules and regulations in F.C.C. Part 68. If such changes can be reasonably expected to render any customer terminal equipment incompatible with telephone company communications facilities, or require modification or alteration of such terminal equipment, or otherwise materially affect its use or performance, the customer shall be given adequate notice in writing, to allow the customer an opportunity to maintain uninterrupted service.

# Others

- If there is any trouble, disconnect the unit from the extension line and connect a known working phone. If the known working phone operates properly, have it repaired by one of the specified Panasonic Factory Service Centers. If the known working telephone does not operate properly, check the Electronic Modular Switching System (KX-T61610).

- Keep the unit away from heating appliances and electrical noise generating devices such as fluorescent lamps and motors.

- The unit should be kept free of dust, moisture and vibration, and should not be exposed to direct sunlight.

- Do not use benzine, thinner, or the like, or any abrasive powder to clean the cabinet. Wipe it with a soft cloth.

## WARNING:

TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS PRODUCT TO RAIN OR ANY TYPE OF MOISTURE.

"This equipment has been tested and found to comply with the limits for a Class B computing device in accordance with the specifications set forth in Subpart J of Part 15 of the FCC Rules. If this equipment does cause interference to radio or television reception which can be determined by turning the equipment on and off, use the equipment in another location and/or utilize an electrical outlet different from that used by the receiver."
