give you efficient
communications
in style

FLASHCOMM™ PLUS AND COMM™ I

F E A T U R E S

FlashComm™ Plus

Comm™ I

Added Features for More Efficient Communications – Now and in the Future

Streamline your company's communications environment with FlashComm Plus and Comm I Telephones. These modern electronic units greatly increase call efficiency at remarkably low cost for such advanced design.

New features have been added to increase the appearance and use of these cost-effective instruments. Faceplates have been changed to provide a sleek, compact, low-profile appearance that blends well with today's modern office equipment.

Special Features of FlashComm Plus Telephones

With FlashComm Plus, all the advantages of an advanced, pushbutton electronic phone plus single-touch Flash, New Call and Call Hold capabilities are at your fingertips.

Flash

Maddening hookswitch frustrations are a thing of the past. The flash feature lets you obtain the special dial tone you need to use PABX features. The press of a single button provides access to Conferencing, Call Transfer and Camp-On/Call Back.

New Call

Allows the user to terminate a call and obtain a dial tone without having to hang up.

Hold

It's easy to place a call on hold or retrieve it. The LED indicator keeps you reminded.

Features of the FlashComm Plus and Comm I Telephones

When lifting one of these phones, users will note the substantial, quality feel. A generous 12-foot handset cord permits considerable freedom of movement while the unit stays in place on your desk.

These phones are fully modular, with "skinny wire" line cords. Connection,

disconnection and replacement are quick and simple.

Handsets have a solid feel and are comfortable and easy to use. They exhibit outstanding performance in all office environments. And the handsets are hearing-aid compatible.

Another "standard" feature is the Alert lamp providing visual indication of both ringing and call waiting. Both FlashComm Plus and Comm I are designed for either desk placement or convenient wall mounting. All

necessary hardware for wall-mounting is included.

Both phones have a modern slimline appearance with housings finished in an attractive combination of antique white and textured charcoal colors. New furnished faceplates are gray with a white accent strip. Woodgrain finish is also available on special request at a nominal charge. In quality and appearance, these business telephones fully complement the FGBS family of electronic business products.
