# LOGIC 20 Key Telephone Sets

## LOGIC 20 sets provide more of the same

More capacity for the subscriber. More profits for the telephone company. The same advanced features built into all LOGIC system telephone sets.

## 19 buttons for line pickup or features, plus hold button

The illuminated self-designating buttons are field-convertible to the non-locking mode, so any not used for line pickup can be used to control other service features such as add-on, intercom and signaling when they are available with the associated key telephone system.

## Add the LOGIC handsfree unit and enjoy completely handsfree telephone conversations.

As with other sets in the LOGIC telephone series, a simple field modification enables the LOGIC handsfree unit to be used with the LOGIC 20 set.

## Shared service

Two or more persons can share the LOGIC handsfree unit by unplugging it from one set and plugging it into another.

## Another field-activated option lets your subscribers enjoy private, handsfree conversations using a VENTURE 1\* or other headset.

All LOGIC 20 key telephone sets contain provision for field-activation of a standard headset jack which is mounted on the side of the unit. When this feature is activated your subscribers can plug in almost any headset and enjoy all of the advantages of private, handsfree conversation. And they can alternate between headset and handset operation as desired, using the selector switch.

## All the other features that subscribers and operating companies appreciate

- DIGITONE\* pushbutton or rotary dial (field-convertible, too)
- universal mounting – same set mounts on desk or wall (with separately ordered wall-mounting bracket)
- compatible with 1A1, 1A2 and 6A key telephone systems
- compatible with a wide array of special application equipment such as autodialers, voice and data couplers, etc.
- rugged construction
- easy to service
- standard parts used extensively
- no-jam hookswitch
- third-party calling position

## Ordering information

To order, specify quantity, product code number and product name. Also specify the color code suffix for telephone sets: warm white (-20) or chameleon gray (-35). Product code numbers and correct names are as follows; all remarks in parentheses are for your guidance only.

## Telephone sets

- QSK202A LOGIC 20 Key Telephone Set (rotary dial, 20 buttons)
- QSK2202A LOGIC 20 Key Telephone Set (pushbutton dial, 20 buttons)

## Bracket

P0515934 Mounting Assembly (wall-mounting bracket)
