## **APPLICATION INSTRUCTIONS**

1. Be sure surface upon which this transfer is to be mounted is clean.
2. Separate protective paper backing at edge and peel back to expose a sufficient amount of adhesive to serve as an anchor to the surface.
3. Position transfer on surface and squeegee down the exposed adhesive firmly to same.
4. Continue slowly the stripping of the protective paper, squeegeeing down the film firmly to surface as you go. This prevents trapping air blisters between film and surface.

### **CAUTION:**

**DO NOT APPLY IN FREEZING TEMPERATURE  
DO NOT APPLY TO WET PAINTED SURFACE**
