

ERICOVOX RAPID for Decadic Impulsing

ERICOVOX RAPID for Decadic Impulsing

LM Ericsson's loudspeaking telephone, the ERICOVOX, a worthy complement to any basic telephone, is now available with pushbuttons for decadic impulsing.

It is an instrument bearing the same high-quality hallmark as that characterising the ERICOVOX with dial.

Valuable hands-free operation is obtained with voice controlled circuits.

Speech direction is determined by the speaking party.

Very simple to use. ERICOVOX RAPID has only three control buttons:

Line selection — Extra amplification — Microphone cut-out

ERICOVOX RAPID is available in light-grey color.
