

CS2905AG1-58 TELEPHONE SET

IDENTIFICATION AND MAINTENANCE

1. GENERAL

1.01 This section contains information on the CS2905AG1-58 (Fig. 1) DESIGN LINE® decorator telephone (Glow Phone).

1.02 The reasons for reissuing this section are listed below. Revision arrows are used to emphasize the more significant changes.

- Change name from Glo Phone to Glow Phone
- Remove Table A.

1.03 Telephone sets having "CS" (CS2905AG1-58) in their apparatus code do not include telephone company-owned components. They are for sale to the customer in their entirety (the housing as well as the transmission and signaling components).

2. IDENTIFICATION

2.01 The CS2905AG1-58 (white) is a new DESIGN LINE decorator telephone set (desk only) featuring a membrane dial keypad that becomes illuminated when the handset is off hook. The faceplate is black when not in use. The set contains an electronic dial-network circuit to provide TOUCH-TONE® dialing. It also contains an electronic tone ringer with on/off control button and is equipped with N-type handset and modular jacks.

2.02 The tone ringer volume is continuously adjustable. The ringer volume control is accessed at the back of the set. An on/off control providing visible indication of status is located on the right side of the set.

3. MAINTENANCE

3.01 No adjustments or wiring changes are to be performed on these sets on the customer's premises.

3.02 When it is desired to return a set to Western Electric for repair, it should be packed using an appropriate protective packing material.
