

TELETYPEWRITER DIRECTORY

DECEMBER 7, 1931

THIS is the first issue of the new Bell System Teletypewriter Directory. Because of the rapidly increasing number of subscribers to the service, this directory will be published weekly for the time being.

AND ASSOCIATED COMPANIES

TELETYPEWRITER DIRECTORY

Corrected to December 7, 1931

How to Call the Company on Service Matters

- For Numbers Not Listed in the Directory . Signal the Teletypewriter Operator**
- To Report a Teletypewriter Out of Order . Consult your Teletypewriter Instruction Card**
- To Report Irregularities and Obtain Assistance on Calls Signal the Teletypewriter Operator and ask for the Chief Operator**
- For Business Transactions, Orders for Service, Bill Inquiries, etc. Telephone the Business Office**

American Telephone and Telegraph Company
and Associated Companies

Copyright, 1931, by Amer. Tel. and Tel. Co.

Printed in U. S. A.

General Description of Teletypewriter Service

Teletypewriter service is furnished on substantially the same basis as telephone service except that communication is typewritten instead of oral. Teletypewriter stations are connected to central offices and through these central offices communication may be established with other teletypewriter stations similarly

connected in the same city or in any other city.

During the connection of two teletypewriter stations, communication may be carried on in either direction but not in both directions simultaneously. This permits a two-way communication service on the same connection.

Charges for Service

Guarantee of Usage

Service is furnished subject to a guarantee of a minimum amount of revenue from local and out-of-town connections as specified in the service application.

Local Connection Rate

For each connection between stations within the same local service area, for each 5 minutes or fraction thereof \$.20.

Out-of-Town Connection Rates

For connections to stations outside the local service area the

rates for 5 minute connections depend upon the air line distance to the called city, for example:

\$.50 for 50 miles
.90 for 150 miles
1.15 for 250 miles
1.60 for 500 miles, etc.

Overtime charges for each minute, or fraction thereof, in excess of 5 minutes are approximately 20% of the initial 5 minute rate.

The Teletypewriter Operator or the Business Office will be glad to furnish the 5 minute rate to any city upon request.

Supplemental Equipment and Special Service Features

General

Requirements for supplementary facilities or special service features will be met in so far as this is practicable.

Collect Calls

Out-of-town connections may be ordered on a "collect" basis, i. e., charged against the station called, if charges are accepted at the called station. If charges

are not accepted and connection is not established, a limited charge known as a "report" charge will apply.

Sequence Calling Service

A number of connections may be ordered at once and completed in sequence, i. e., the operator puts through a succeeding call just as soon as the previous one is finished.

General Information

Placing and Receiving Calls

In placing a call, when the operator answers, type the name or abbreviation of the city and the number of the station desired as shown in the directory. If the number is not listed type the firm name and address. In receiving a call, answer by typing your city name or code followed by your station number and firm name.

Hours of Service

Service is available daily during the usual business hours and by special arrangement can be made available outside of these hours.

Directory Listings

A subscriber's listing consists of his name, business designation, street address and his call number which includes the city name (or code) and station number. Listings are arranged alphabetically under city name headings and the city name headings are arranged in alphabetical sequence. Where the name of the subscriber clearly denotes the business engaged in, the business designation is omitted from the listing.

Subscribers desiring to change their directory listings or to secure additional listings should consult the Business Office.

Additional Directories

To secure additional copies of this directory, call the Business Office.

Applications for New Service, Changes in Location, Discontinuance of Service

All matters relating to new service, removals, termination of service, directory listings, adjustment of accounts, collection of bills, etc., are handled at the Business Office.

Subscribers desiring teletypewriter equipment rearranged or moved from one address to another or discontinued either permanently or temporarily should notify the Business Office not less than ten days in advance.

Stationery Supplies

It is necessary for the subscriber to arrange for a supply of suitable paper and typewriter ribbons.

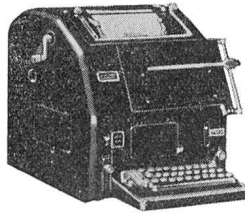

Errors in Directories

Every effort is made to make the directory as accurate as possible. Sometimes despite the care and attention given it, errors will creep in. Please check your listing and if it is incorrect, call the Business Office promptly.

The Telephone Company's liability for damages arising from errors or omissions in the making up or printing of its directories, or in accepting listings as presented by subscribers or prospective subscribers, shall be limited to the amount of actual impairment of the subscriber's service, and in no event shall it exceed the amount of the guarantee and any fixed charges paid for the service during the period covered by the directory in which the error or omission occurs.

Foreign Attachments or Connections

The Telephone Company will not attach or connect its equipment or lines to wiring, excluding power outlets, at subscriber's premises installed by others than its own employees. The subscriber may not use or permit to be used any electrical or mechanical apparatus or device in connection with the equipment or lines furnished by the Telephone Company without the written consent of the Telephone Company, or permit the attachment of any advertising devices except upon approval of the Telephone Company. In case any instrument, apparatus or device of any kind other than that furnished or approved by the Telephone Company is attached to or connected with any part of the Telephone Company's property, the Telephone Company reserves the right to remove such instruments, apparatus or devices or to deny service so long as such instruments, apparatus or devices are so attached or connected, or to terminate the service.

WHAT THE TELETYPEWRITER IS AND HOW IT OPERATES

The teletypewriter looks and operates like an ordinary typewriter. Messages, reports, inquiries, typed in your office are *instantly* and identically reproduced on any other teletypewriter to which it is connected . . . 300 feet or 3,000 miles away.

As a subscriber to this Bell System service, your typist simply calls the desired teletypewriter by typing its number and “central” immediately makes the connection. Connections are made for five minutes or as long as you wish.

TEN OUTSTANDING FEATURES

Two-Way

Service Subscribers can type back and forth on the same connection, making inquiries and replies possible.

Speed Connections are fast—comparable to the telephone.

Flexibility Letter size paper or your own forms for orders, reports, deliveries, and similar matters can be used . . . As many as six copies can be made by each teletypewriter.

Availability The same as telephone service. Teletypewriter “central” will connect any subscriber anywhere in the United States at any time to any other subscriber.

Accuracy The copy received is identical with that transmitted . . . Ambiguities in text can be clarified during the connection.

Simplicity Any competent typist can operate it.

Privacy Communication is direct between sender and receiver.

Permanent

Records Each subscriber has typewritten copies.

Low Cost A most economical form of written communication.

Dependability A Bell System service.

For further information call your Telephone Business Office
