

# NEW <sup>FARM</sup> interphone

- Stretches your time • Gives you tighter control of your operation

Farm Interphone ties your whole farming operation together. It's a new system that gives you both regular telephone service and intercom from strategically located points around your farmstead.

With it you can talk and hear over a wide area

without taking a step or interrupting your work. Your wife can handle calls and talk with you without constantly running to and from the buildings.

Interphone helps you run things more smoothly — accomplish more every day.

## Basic equipment

The basic Farm Interphone system consists of one main telephone in the house, an extension phone in the barn or other buildings and a two-way loudspeaker located in the barnyard. Each telephone is equipped with a special loudspeaker-microphone. Extra phones or loudspeakers are optional.

## Hear that ring?

When you prefer, your telephone ring is broadcast over the outside speaker and speakers at other Interphone stations. This means you don't miss important calls when you're away from the house or the farm buildings.

## Saves trips between house and farm buildings

Suppose your wife has an outside call and she needs to discuss it with you. She can "hold" the call, "broadcast" to you, get your reply, then complete the outside conversation. Or you can take over the call in the barn, if you wish. From the main station your wife can connect you with the outside caller.

## Talk "hands-free" right where you are

When your wife calls on the intercom you can answer without picking up the phone, without interrupting your work. A handy feature around the farm. Or, if you want privacy, pick up the phone and talk directly to her.

## It makes farm living safer

In an emergency a person on an Interphone farm can make his voice heard all over the farmstead through one or more stations. You can't put a dollar value on this benefit.

## Fence is fixed, what's next?

Time and steps are saved by planning and outlining the next job over Interphone. Otherwise you'd have to spend time locating your helper or he'd have to find you.

## Need to locate a hired hand?

Pick up the receiver at any station and you can broadcast your voice to all the other stations, including the loudspeaker in the yard. A quick, effortless way to locate another person.

## It talks to you and you can talk to it

The loudspeaker broadcasts or picks up your natural speaking voice at considerable distance. The paths between the buildings get shorter with it on duty in the farmyard.

## An "ear" in the farm buildings

Each Interphone station is an alert "ear." All sounds are transmitted to the house. Your prompt attention may very well save animal life or property damage.

If you'd like to know more about Farm Interphone and what it can do for you, just call your local Bell Telephone Manager—or ask your telephone man when he is in the neighborhood—or mail the coupon below. There's no obligation on your part, of course.
