

Making the Home *more* Livable Than it has Been before

With this modern note of convenience: Telephones throughout the house, for greater ease and comfort.

WOMEN today lead interesting, strenuous lives! There are so many places to go . . . so many things to do. But even with this new activity, there is one thing that still stands out above all others: *Making the home more livable and more attractive than it has ever been before.*

A kitchen that is a model of modern utility. Furniture with just the right touch of smartness. Guest rooms that draw little exclamations of delight from those who see them. And telephones, of course . . . telephones *all through the house*, so one is always near at hand wherever you happen to be.

It is really surprising how much the right telephone arrangements do add to convenience and comfort. In time and steps saved . . . in preventing "lost" calls . . . in affording privacy of conversation, when that is desired.

The cost is low, whether your house calls for a complete intercommunicating system, or just an extension telephone or two. Your local Bell Company will gladly help plan the arrangements which will give you the greatest convenience and satisfaction. Call the Business Office today.

Comfort is the dominant note of this library alcove, with its deep, easy chair, its books—and the telephone right at hand for ease in placing and answering calls. The telephone literally brings the world to your elbow. . . . your neighbor across the street . . . friends in other cities . . . even London, Paris or Berlin.

The modern bedchamber has, of course, a telephone . . . for true comfort and convenience, and the assurance of quick communication in time of possible emergency.

The kitchen telephone is essential in conducting household business, saving steps and time, preventing such domestic tragedies as burnt biscuits and scorched roasts.
