TELEPHONE SET — 500AD

CONNECTIONS

1. GENERAL

1.01 This section contains connection information for the 500AD telephone set for use with individual lines and 1A1 or 1A2 key telephone systems.

1.02 This section is reissued to provide normal distribution.

1.03 The 500AD telephone set is a desk-type set equipped with a plug-ended mounting cord and is intended for 4-wire service. In addition to the normal line switch functions, one spare transfer (PMB6) and two make (EM3 and EM5) contacts are provided for optional connections.

1.04 This telephone set is factory wired for use with 3-type speakerphone and 4-wire service.

1.05 The 500AD telephone set is available in black (-3), green (-51), light beige (-60), and light gray (-61).

2. CONNECTIONS
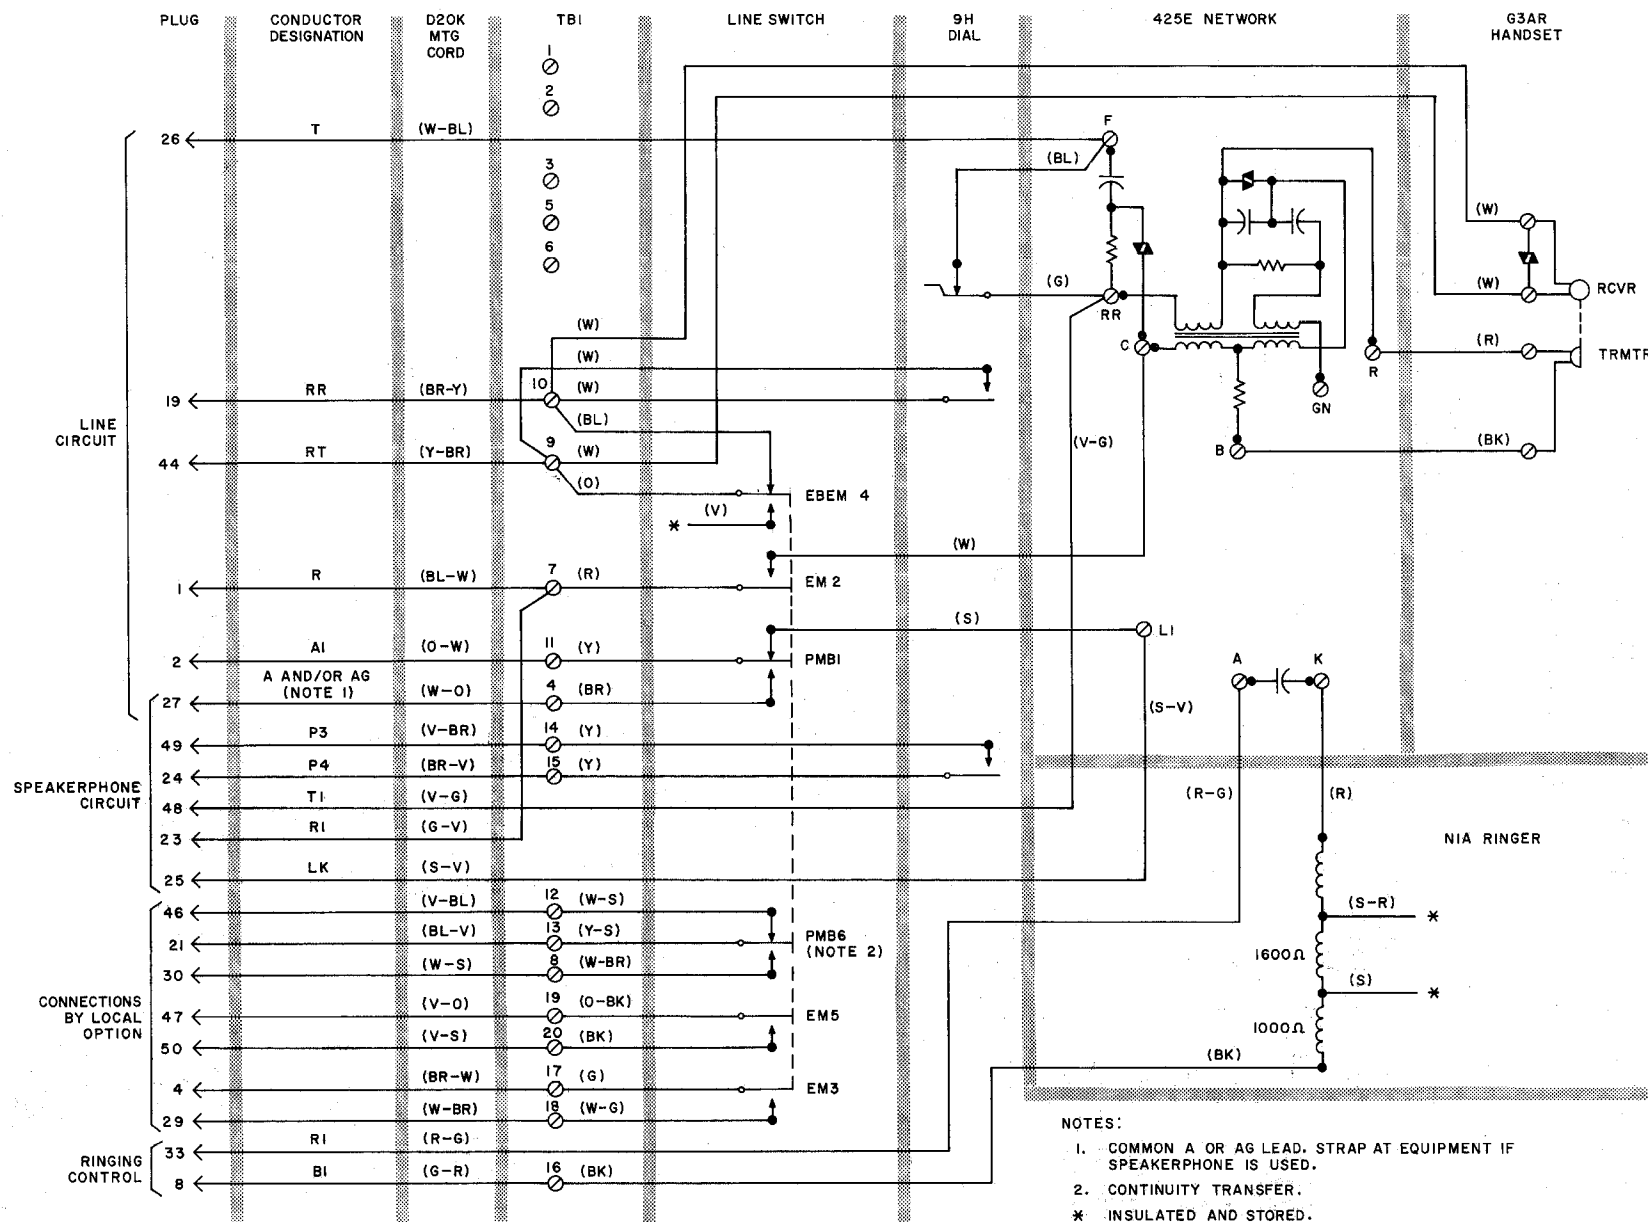

2.01 Conections for the 500AD telephone set are shown in Fig. 1.
