TERADYNE

STEPPER CENTRAL OFFICE TESTER (SCOT*)

1. GENERAL

1.01 This is a cover sheet for the Teradyne Stepper Central Office Tester (SCOT) operating instruction, not included here but available from the manufacturer with each installation. Pacific Telephone Engineering Letter (PTEL) 2248 authorizes the use of this equipment in Pacific Company.

1.02 (Reserved for future use.)

1.03 SCOT is a management tool for step-by-step central office maintenance. It can determine the ability of a subscriber to place and receive calls by making originating and terminating test calls from their central office equipment. It then reports the results of the tests on a local display unit/printer or remote display unit/printer.

1.04 The SCOT may be programmed to *hold* on the failure allowing craft personnel to locate and clear troubles. Many manual routines are eliminated and better service level objectives are met.

1.05 If corrections are required in the manufacturer's instruction, use Form E 3973-1PT as described in Section 000-010-901PT to process the correct information.

1.06 If equipment design and/or manufacturing problems should occur, refer to Section 010-700-011PT for procedures on how to file an Engineering Complaint for General Trade Products (GTPs).

1.07 When revised instructions reflect changes due to modification of equipment, retain the superseded information until equipment is modified.
