3000	375	26	376	4.0	.0073	.0630	.1030	.0328

Note: All reactances are negative. Angles are in degrees and negative. Values based on dry weather, average temperature conditions.

$\beta$  = Phase shift in radians per circuit mile.

B = Phase shift in cycles per circuit mile, out and back =  $\frac{2\beta}{2\pi}$
