2. DESCRIPTION . . . . .	1
3. USE . . . . .	2

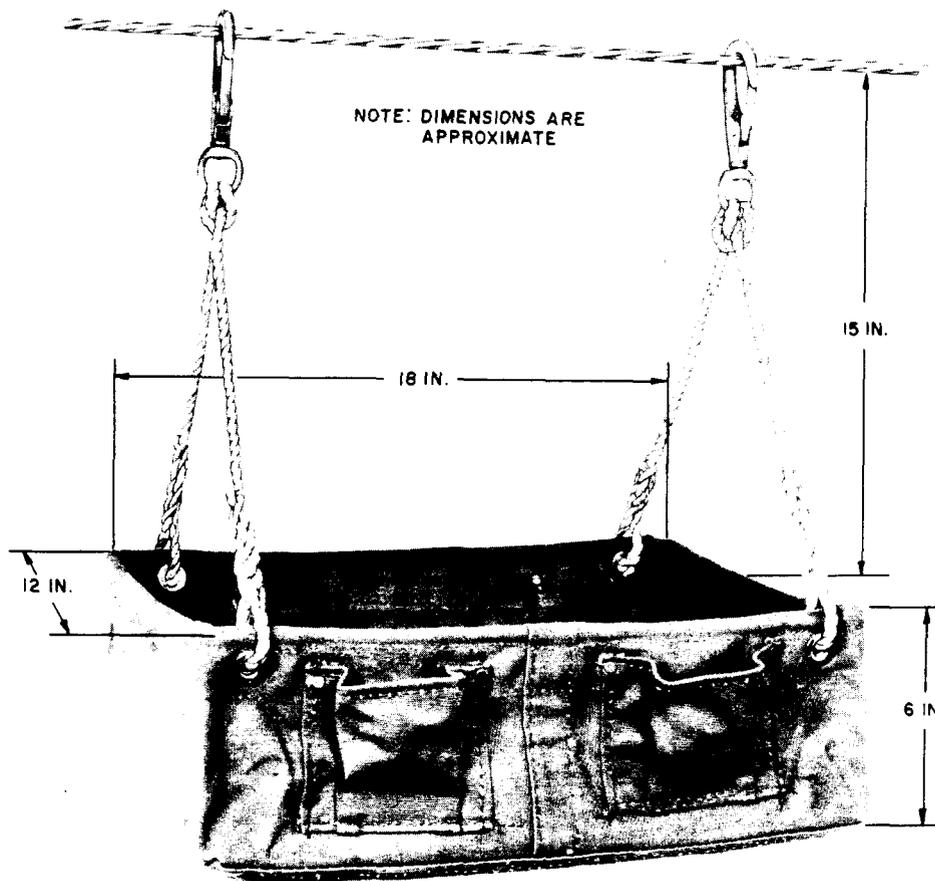

**1. GENERAL**

**1.01** This section has been issued to provide a description of the B Canvas Tray and to list its uses.

**1.02** The B tray presently available is a modification of an earlier version of the B tray which did not have pockets.

**2. DESCRIPTION**

**2.01** The B Canvas Tray is a collapsible, rectangularly shaped tray made of medium weight green cotton duck with a covered Masonite floor. It has two 5-inch wide pockets on one side and one 10-inch pocket on the opposite side. The pockets are sewn onto the outside of the tray. The B Canvas Tray is shown in Fig. 1.

**Fig. 1 — B Canvas Tray**

**SECTION 081-020-130**

**2.02** The B tray is equipped with two 1/4-inch manila rope loops, each provided with a galvanized swivel eye snap hook for attaching the tray to the strand.

**3. USE**

**3.01** The tray, when suspended from the strand, is used for holding tools and materials. It may also be used to catch refuse from cable splicing operations.
