

OVERALL LINEUP
2-WIRE REPEATERED NONLOADED PBX-CO AND LOCAL WATS TRUNKS
FOR PBXs NOT REQUIRING TERMINAL BALANCE

1. GENERAL

1.001 This addendum supplements Section 311-240-502, Issue 3.

1.002 This addendum is issued to correct a test set switch setting in Step 4 of Part 4.

4. OPTIMIZING THE 830E NETWORK

The following change applies to Part 4 of the section.

(a) 4.01—revised.

STEP	PROCEDURE
4	◆ Insert the repeater into the turret of the 54B test stand. Rotate the turret so that the adjusting screws on the 830E network are accessible at the front of the test stand. Set switch S1 to RL LINE B and switch S2 to neutral.◆
