1. GENERAL

1.01 This BSRS provides a numerical checking list of available Bell System Repair Specifications which have been covered in BSRS Lists 320 through 328 prepared by the Indiana Publication Center. It is the intent that BSRS Lists issued subsequent to List 328 are to be considered as supplementary to this checking list until it is reissued. It is the plan to reissue this checking list semiannually.

1.02 The "Issue" column of this checking list indicates the authorized issue of BSRS Page 1 Indexes. Since BSRS's do not have an issue number for the entire document due to the method of revision whereby individual pages and drawings are reissued, the issue of the BSRS Page 1 Index is used for reference and record purposes.

1.03 Changes and additions are indicated by asterisks (*) in the left-hand margin.
