

CARRIER

You may never have heard of a K carrier circuit, but it has often heard you.

It's a Bell Telephone Laboratories development by which two pairs of wires in parallel cables can carry as many as twelve separate conversations at the same time!

K carrier circuits are being built into many miles of Long Distance cables. *This is one of the ways we have of adding a lot of long circuits in a hurry to meet the needs of national defense.*

★ **LONG DISTANCE** helps unite the nation
