

KELLOGG CORD LESS P.B.X.

Improves Service- Increases Revenue

Hundreds of telephone managers are daily adding to their revenue and improving service with Kellogg Cordless Private Branch Exchange Switchboards. A careful survey of your city will reveal a surprising number of patrons who could improve their service at a profit to themselves, as well as to the telephone company, by utilizing one of these equipments.

Every office, school building, industrial plant, hospital, warehouse and other institutions, using more than two

telephones or extensions, but not large enough to justify a floor type P.B.X., is a prospect for a No. 6 Kellogg Cordless and will be greatly interested. Kellogg will help you solicit this business by assisting you in planning your newspaper and direct mail advertising.

Note: Carry this copy of *Telephony* with you when you go out to sell a Kellogg Cordless P.B.X. Board. The diagram will help present to your customer the flexibility and advantages of such an installation.
