

11-and 20-button desk key telephone sets
Multiline Conferencing
at your fingertips

11-and 20-button desk key telephone sets...

bringing to key telephone systems multiline conferencing with automatic button restoration and line recall capability... convenient, time saving, money saving

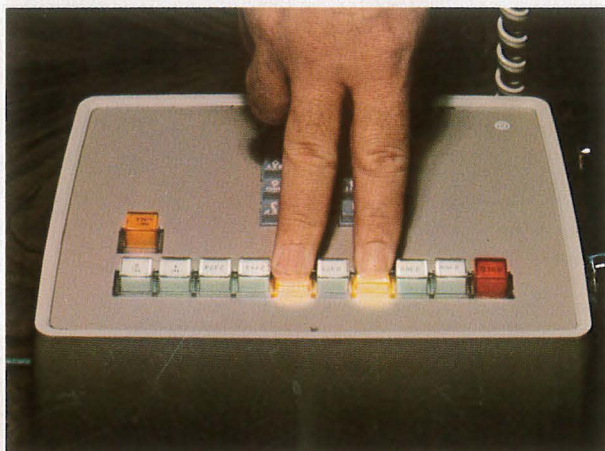

Now you can conference two or more outside lines ... simultaneously!

Designed for the rapid pace of today's business world, this new feature offers the fastest, most efficient method of setting up and conducting conference calls. Up to 7 lines of the 11-button set and up to 15 lines of the 20-button set may be used as conferencing lines by simultaneously depressing the line buttons on the lines to be used. *And, most important, present installations can be adapted for multiline conferencing.* †

Time is money and this feature can save you a great deal of both.

Reduce confusion with automatic button restoration

With this convenient feature you just return the phone to the cradle and

all locked-down buttons release and pop-up... automatically... to avoid mix-ups and inadvertently cutting in on someone else's call.

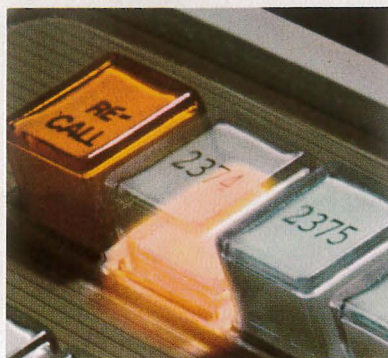

Line recall prevents embarrassing disconnects

A special recall button lets you flash your operator without losing a call or breaking a conference connection. It brings back the dial tone, allowing you to make another call. All previously depressed buttons remain in that position.

Select the type of phone and color you prefer

The 11- and 20-button desk key telephone sets are available with rotary or Touch Tone® dialing in eight decorator colors to suit your taste and office decor.

See your local representative for full information on multiline conferencing for your business.

Special note for those with special needs: Handsets which increase the receiver volume for those who are hard of hearing and handsets which amplify sound for those who speak only in a whisper, may be ordered.

†Since no line amplification is provided, voice quality on conferenced calls may decrease, depending upon the distance between the conferees and the number of persons on the conference call.
