

Talk about a status symbol. The busy lamp field has it all.

BUSY LAMP FIELD KEY TELEPHONES

Meet Jan Taylor. She's a photographer for a well-known fashion magazine. Her job is one of constant deadlines, quick decisions, and instant communications. She couldn't work without her 10-Button Key Telephone with busy lamp field.

She has access to a maximum of nine lines . . . plus a busy lamp field that shows the status of up to 24 stations.

She answers incoming calls by pressing the appropriate flashing buttons. If she wants to confirm the time of a photography session without disconnecting the caller, she pushes down the red HOLD button, and is free to dial inside or outside on an alternate line.

One glance at the lighted numbers on the busy lamp field tells her that the fashion editor is busy on station 17, but that the associate editor is free on station 10.

Jan Taylor knows what you will find out: The 10-Button Key Telephone with busy lamp field is the key to success in the really busy office.

Colors. You have your choice of six different phone and ten different faceplate colors. You may agree with these first six color matches we have suggested. Or you may decide to create different color combinations, using any of the ten faceplate colors.
