LET'S MAKE A DEAL

WE CAN ALWAYS USE YOUR SURPLUS OR OBSOLETE TELEPHONES AND ACCESSORIES REGARDLESS OF TYPE OR CONDITION. WE PAY CASH OR TRADE ON-THE-SPOT

SALES POLICY

TERMS: Net 30 days. Open account to rated companies. Prices are Subject to Change without notice. NO RETURNS ACCEPTED WITHOUT OUR APPROVAL.

SHIPMENTS: Parcel Post, United Parcel Service or Motor Freight. F.O.B. Warehouse, Unless otherwise stated.

GUARANTEE: All Equipment is Guaranteed with Return and Refund Privilege, Subject to our approval and handling charge.

OFFICE HOURS: Monday through Friday from 8:30 AM to 4:30 PM.

Dear Customer:

We are happy to present you with this, our 30th Anniversary Catalog. In it you will find several new products which we have developed during the past year, and of course, we still have our old standbys such as the Model 1011 Linesman's Test Set and the 81A.

Unfortunately, we simply could not hold all of our old price lines because of continued rising costs of labor, material and outside services. However, we have tried to keep our new prices competitive without forsaking quality as you will learn after reading these few pages.

I want you to know that I am real proud that my son Jack has taken a keen and active interest in the running of our business which I formed 30 years ago. He will, I am sure, maintain the same standards of loyalty, honesty and integrity which is instilled in all of our personnel.

Don't forget, give us a call anytime to either say hello or to serve your best interest.

Sincerely,

WARREN "BONES" BOHNSACK

BECO 1011 LINESMAN'S TEST SET

The BECO 1011 is probably the most widely used, and time-proven Test Handset in the world. Manufactured in the U.S., of pliable rubber construction protecting all standard components, the 1011 is rugged, easy to handle, and can be used by Linesmen or Central Office personnel depending upon the test leads chosen.

It is primarily used to test the switching and continuity of subscriber circuits and to locate trouble in various equipment circuits.

Their are (2) basic models available: The standard Model 1011 and the high impedance "data" Model 1011-A.

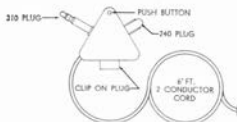

CAN YOU FIND ANY FAULT?

Linesman's - w/Alligator Clips	\$45.50
C.O. Model - w/Test Tool	\$65.00
Data Model - Linesman's	\$53.50
Data Model - Central Office	\$73.00

MULTIPLE USE TEST TOOL AND CORD—For use on all central office and toll office handsets. It can be used on all types of line finders, selectors, connectors, rotary switches, concentrators, inter-office trunking equipment, coin trunking equipment and on all types of frame and TDF trunking connections.

It implements the use of the 240 plug, the 310 plug and a touch-on (or clip-on) plug all in one unit. The push button places 1000 ohms from ground to tip to bring up the dial tone. **PRICE: \$19.50**

BECO 81A TEST SET

FIND AND FIX TROUBLE FASTER

The 81A Test Set consists of a buzzer, capacitor and switch, which are contained in a case made of insulated material. It takes standard flashlight dry cells.

Trace conductor pairs which cannot be traced readily by sight.

Make continuity tests on conductor pairs.

Supply talk battery for communicating between two or more terminations of wires or cable.

Weather cord with piercing test clips.

PRICE: Less batteries & cord..... \$14.00
Test Cord only \$ 3.25

COLONIAL WALL TELEPHONE**"OLD AMERICA"**

Each Colonial Wall Telephone is an authentic reproduction from America's past. These beautiful, handcrafted recreations bring out our Early American Heritage, yet are designed to provide modern, extremely high-quality telephone communications.

In each cabinet, a standard up-to-date telephone network with ringer is utilized with a dialing mechanism. A face plate conceals the phone circuitry leaving only the dial enclosed. The "Antique" transmitter and "Long Pole" receiver has standard elements installed thus providing a perfect talking circuit.

The telephone extension cord is furnished with a standard telephone 4 prong plug that fits into the extension jack provided by the telephone company. Simply plug in and operate.

BECO is proud to offer these unique telephones filled with American tradition. There is a spot in your home whether it be kitchen, den or living room where "Old America" will constantly remind you also, to be proud of your heritage.

MODEL 14WP-D OUTDOOR WEATHERPROOF TELEPHONE ENCLOSURE

Ideal for Swimming Pools, Taxi, Police, Railroads and Mines, the Model 14WP-D Weatherproof Enclosure is designed to house all standard manufacturers wall type telephone sets. A universal mounting plate is furnished with the cabinet for this purpose.

MODEL 14WP-D

The durable cabinet is constructed of 18 gauge steel with a 16 gauge hood and painted with Industrial Gray baked enamel. A heavy duty locking handle is installed on the front hinged door. The assembly measures 14 inches high, 12 inches wide by six and one-half inches deep, not including the overhang. A hole for conduit is on the bottom as is a screened opening for ventilation. Additional holes covered with plastic plugs are placed suitably for either wall or post mounting. Decorator colors are available at a minimum charge and must be specified on the order.

PRICES

Model 14WP-D complete with universal mounting plate, heavy duty handle with lock and keys - Painted Gray	\$64.95
Model 14WP-D2 - Same as above but 2 inches wider for magneto telephones	\$69.95
Special Decorator Color	Extra: \$10.00
Single line dial telephone w/ringer	\$18.60
Magneto telephone - all installed	\$34.50

MODEL 14WP-RR2

RAILROAD MAGNETO TELEPHONE

The Model 14WP-RR2, primarily used by railroads, is BECO's latest model of a series of magneto telephones which are custom built to meet the exacting needs of railroad and similar services which demand complete reliability, standard, available components, compatibility with existing circuits and easy servicing.

It features an **all aluminum** cabinet similar to the Model 14WP-D to house an **all aluminum** (except components) magneto telephone which features 2 line switching, Cook Type 600 Fused Station Protectors and Cook's 350 VDC Fail-Safe Gas Arrestor units. A microswitch operated by the door is connected to either the line or battery circuits.

3 Standard No. 6 Industrial Batteries may be installed in the ample space provided in the battery compartment. An easily removable service panel permits ready access to the lines, fuses and gas tube protectors without interference with the telephone.

PRICE: \$292.00

NEW
PUBLIC ADDRESS AMPLIFIER
60 WATTS RMS CONTINUOUS

GENERAL DESCRIPTION

The Model 200122 is a public address amplifier designed for continuous duty in demanding applications. The assembly is designed for rack mounting (standard 19" rack) and has dust covers top and bottom.

The output is 60 watts RMS continuous, and gain is ample for full output from dynamic microphones or the 500/600 ohm line input.

In the basic model, frequency response is tailored to the voice range of 300-3500 Hz., but response is potentially that of a high grade amplifier covering the 20 - 20,000 Hz. range. Changing a few small parts can modify the response as desired.

A precedence relay is also provided in the basic model so that the line input, when selected, disables the microphone inputs. This feature can easily be by-passed, if desired.

The amplifier is self contained and requires only 110v, 50/60 Hz. for operation.

PERFORMANCE SPECIFICATIONS

Frequency response: 300-3500 Hz + 2 db
 Power output: 60 watt RMS continuous
 Outputs: Two, separate and transformer-isolated 8 ohms. 70.7 v (line)
 Inputs: Microphone (2) 150 ohm
 Line (1) 600 ohm
 Input sensitivity: Mike - .0013v for full output
 Line - .05v for full output

SPECIAL FEATURES

PRECEDENCE RELAY FOR LINE INPUT
 LED INDICATOR FOR OUTPUT LEVEL
 ELECTRONIC LIMITING TO PROTECT AGAINST OVER-DRIVE
 LIMITING AND CIRCUIT-BREAKER
 PROTECTION - SHORTS
 ALL COMPONENTS EXCEPT TRANSFORMERS ARE STANDARD
 THERMAL CUT-OUT SWITCH ON HEAT SINK
PRICE: UPON REQUEST

RECEIVER - AMPLIFIER HANDSET

These handsets provide added receiver volume for persons with impaired hearing or for telephone sets located in high-noise areas. The handset contains a solid-state amplifier that operates on regular telephone line voltage. A fingertip control knob located in the underside of the handset adjusts receiver volume.

PRICE: NEW - \$69.50

Completely reconditioned like new Receiver-Amplifier Handsets either ITT, W.E. or A.E. are available in black and several colors. Specify second choice.

PRICE: CONDITIONED - \$29.50

TYPE 880 SPEAKERPHONE

RECONDITIONED LIKE NEW—Provides the convenience of hands-free conversation—makes it easier to work while speaking on the phone. Ideal for conference calls. A volume control wheel permits speaker volume to be increased so others in the room can hear. Group can participate in the conversation. No confusion, no repetition, no microphone to pass around. It looks like a Speakerphone—not a desk phone with an attachment. Both telephone unit and loudspeaker are handsomely different in appearance. Gain switching eliminates feedback, singing and other bothersome distortions. The on-off rocker switch, speaker volume control and microphone are all built in. Also has a pleasing tone signal which is heard through the speaker.

Available in several colors - state second choice.

PRICE: \$60.00 Rotary Dial
 \$70.00 Touch Tone

MODEL 88A PORTABLE FIELD TELEPHONE

The BECO Model 88A Portable Field Telephone is the first commercially produced Field Telephone since the introduction of its' predecessor the Famous U.S. Army EE8. The BECO 88A is designed for use on local battery talking, magneto ringing and is compact, rugged and portable. It's performance equals that of the present day commercial telephones.

CONSTRUCTION

The Beco 88A is made up of modern, commercially available components housed in a PVC gray plastic case, 9½" L x 4¼" W x 10½" D. Its weight is 6¼ pounds, less batteries. A push-to-talk handset is utilized to prevent discharge of the batteries when not in use, and an adjustable web sling permits hand or pack carrying and easy hanging in semi-permanent installations.

BECO MODEL 88A COVER
OPEN HANDSET FITS IN
COMPARTMENT WHEN
CARRIED

The BECO 88A is completely reliable and rugged. The only components subject to depreciation are the flashlight batteries, and it is suggested that heavy duty non-leaking types be used. The batteries are enclosed in a compartment which is easily removed from the top using the hold-down screws provided. In the case where the telephone will not be used over long periods of time, the batteries should be removed to eliminate any possibility of corrosion. To field check the batteries, hold the receiver to the ear and blow steadily into the transmitter while alternately operating and releasing the push-to-talk handset switch. A side-tone should be heard strongly in the receiver when the switch is in the operated position, but should not be heard when the switch is in the unoperated position.

LONG RANGE

The talking and signalling range of the BECO 88A varies with the type of line wire in use, the condition of the wire, whether the wire is dry or wet, and whether the wire is on the ground or in the air. A typical installation of twisted pair, non-loaded cable and utilizing the two standard flashlight cells included with the unit, will provide a range of from 11 to 17 miles. In the best case wherein 104 copper open wire lines are utilized a range of over 100 miles is not out of the ordinary. You may also connect BECO Model 88A in parallel to the same single pair line, and with predetermined long and short ringing, selective signalling, party line service is provided.

BECO MODEL 88A BATTERY CASE OPEN

THIS JUST CAME IN!
BECO OFFERS THE SEISCOR
T-84/84R TELEPHONE TEST SET
WRITE FOR DETAILS

Seiscor's Telephone Test Set is designed for use by installation and repair center personnel to verify the operational performance of telephones. Two Telephone Test Set models are available -- the T-84 for 20 cycle ringers, and the T-84R for harmonic, synchromonic and

decimonic ringers.

Simple pushbutton operation results in a visual "pass" or "fail" indication of serviceability for such parameters as loop current, 500 volt breakdown, rotary dial speed, rotary dial percent break, transmitter and receiver output, normal ringer response, ringer connection, long loop ringer response, bell tap and tone dialing. In addition, provision is made for continuity and noise testing of modular, Trimline handset, and spade terminal cords.

The Telephone Test Set eliminates repair status on non-defective telephone sets taken out of service, thus reducing repair costs. The T-84/84R also verifies new sets as good for service and saves installation time lost due to set replacement.

Designed in cooperation with operating telephone company personnel, the Telephone Test Set improves customer service while reducing service complaints. The T-84/84R also introduces a savings in station maintenance, as I & R personnel can make an immediate decision to use a telephone set or place it in repair status.

SPECIAL FIND

★ **ORIGINAL OLD BELL TELEPHONE** ★

A GENUINE ANTIQUE
2 STORY TELEPHONE
WITH
RARE BRASS RECEIVER
AND
HAND CRANK TO RING
BRASS KEY INCLUDED
TO OPEN TELEPHONE

DIMENSIONS: 27 inches High
7 INCHES Wide

We have been fortunate in locating a quantity of these old fashioned telephones. They have not been altered in any way. The circuits, components and cabinets have been left intact exactly the way they were taken from service. Thus, the antique value is preserved. These are magneto telephones and *cannot* be used on modern telephone circuits.
