Porta-printer II is the latest development in the field of telephone communications for the deaf and speech impaired. With Porta-printer II, messages can be sent and received at speeds of up to 60 words per minute over regular telephone lines. Porta-printer II also provides printed copy of the phone conversation. And it is compatible with all other TTY equipment for the deaf.

Porta-printer II operates on battery power, so it can be used anywhere there's a telephone. It can also be operated on home electrical current. And it's easy to use. Just dial the number you want, then connect your telephone to Porta-printer II by placing the receiver on Porta-printer II's acoustic coupler.

Porta-printer II is lightweight. (It only weighs seven pounds.) It can be carried easily and comes with a carrying case, plus acoustic coupler and self-contained power pack.

Porta-printer II is affordable too. It is offered at the low monthly rate of \$14 to Illinois Bell customers who have been certified by a registered physician or recognized agency as deaf or speech impaired. There are also optional payment plans available at higher rates for customers who are not disabled but want to be able to communicate with those who are deaf or speech impaired. And, there's no installation charge because you can connect Porta-printer II yourself, whenever and wherever you want to use it.

Porta-printer II has been designed with space-age solid state components for years of reliable, trouble-free service. If you need repair service on Porta-printer II, there's no extra charge. Just call us. We will replace your unit with another within 48 hours.
