

Bell System

# TIE LINE

Service

a direct  
line system  
that ties  
your offices  
together

# Bell System TIE LINE Service

**Gives Your Business  
These Advantages:**

## EFFICIENCY

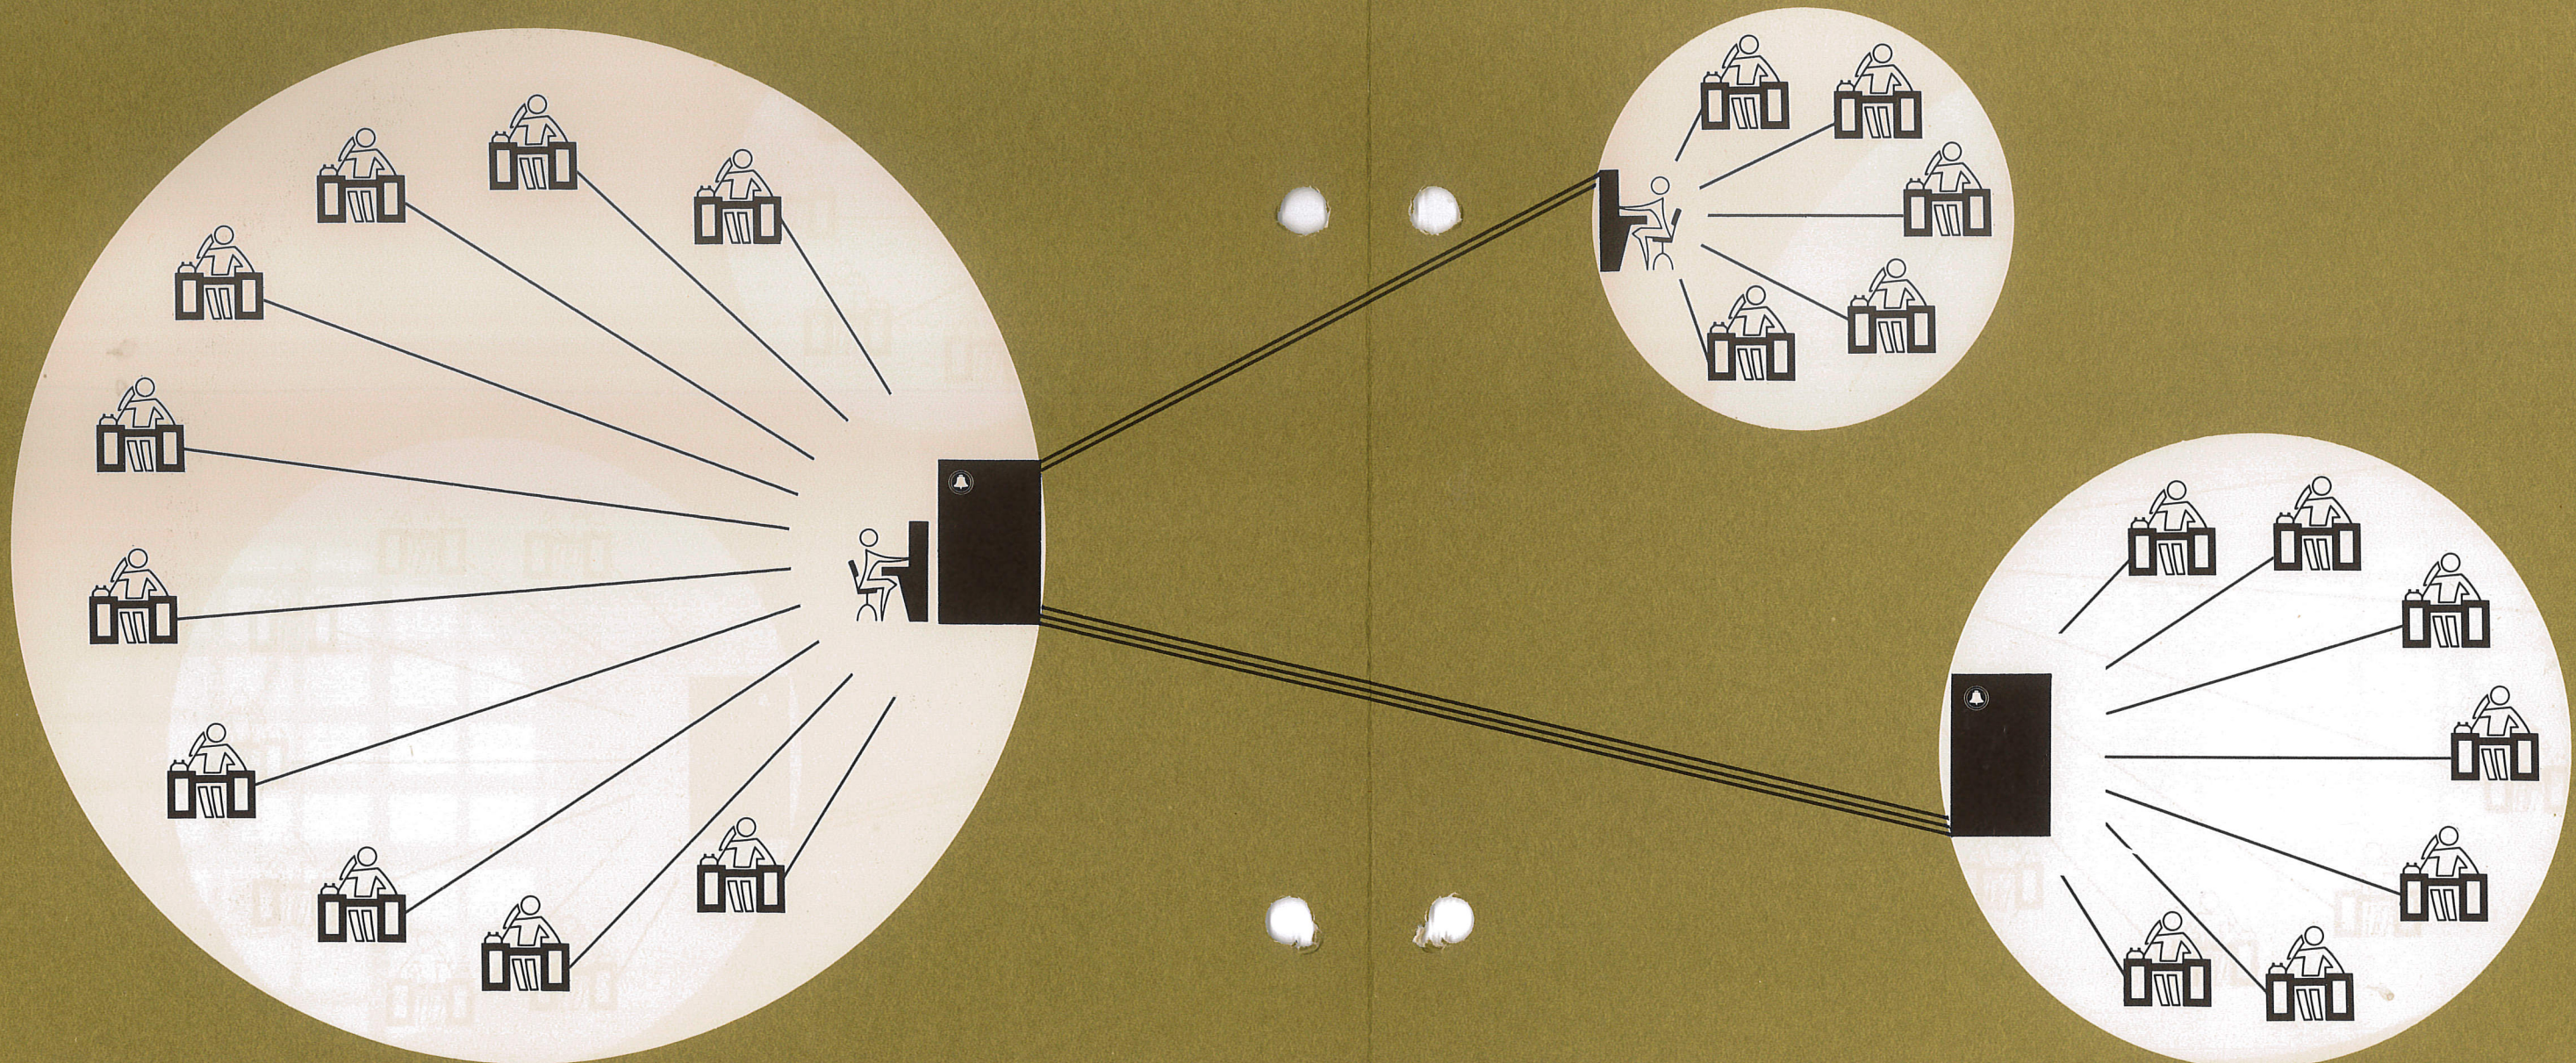

- Gives you fast, direct contact with your separate business operations.
- Speeds internal coordination of general information, follow-ups, control, decision-making.
- Increases effective use of "outside" lines.
  - Keeps lines free for important incoming and outgoing calls.
  - Lets your attendant give incoming calls priority treatment.
- Integrates your total communications systems.

## ECONOMY

- Allows you unlimited calls on tie lines at a flat monthly rate.
  - Reduces Long Distance or measured rate calls.
- Helps reduce the number of "outside" lines needed.
- Allows for additions and alterations as you need them, and there is no capital investment required.
- Supplies more and better service for your communications dollar; saves employee-time.

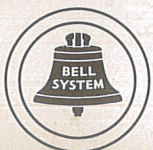

## FLEXIBILITY

- Engineered to your specific needs.
  - Three basic types of tie lines with many variations allow for tailor-made systems.
- Can be used for voice, written or data transmission.
- Signaling and supervision are designed to fit your requirements (manual, automatic or combination).
- Compatible with all Bell System communications systems.

Here is the **TIE LINE** service that will work for you:
