

## AE AA-44 2-key, 2-line, Monophone

Contributed by Jim Hurtle.

Automatic Electric AA-44 2-key, 2-line Monophone Cradle Telephone

Description from Automatic Electric Catalog 4055-D (7-44) Page 15:

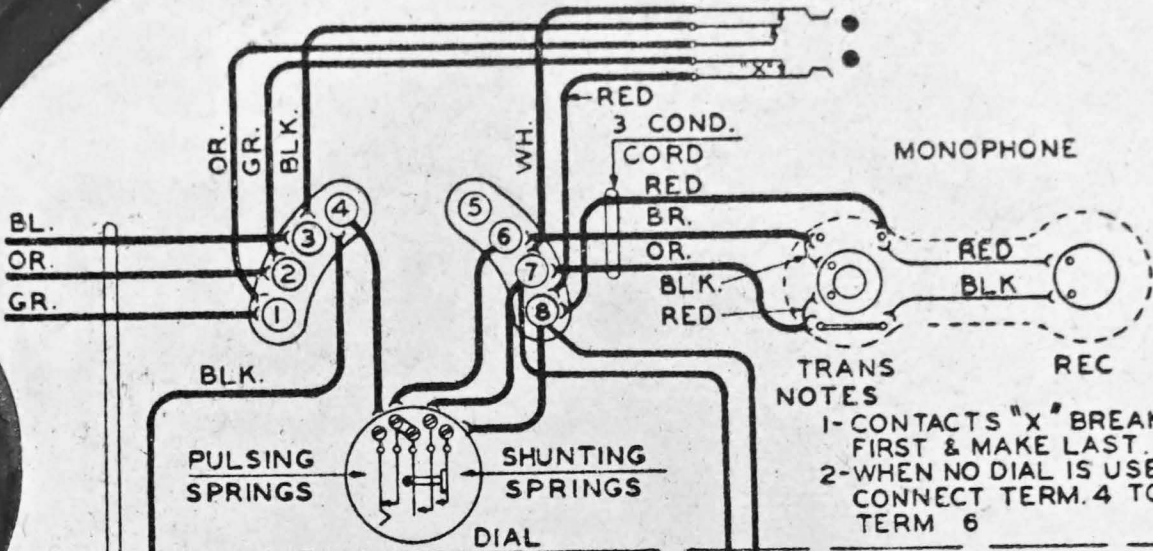

Cat. AA-44 - Holding on both lines – Automatic

Equipped with two keys: a "line" key, which is used in switching from one line to the other; and a "hold" key, which, when operated, holds the connection on whichever line is not being used for conversation. If the "hold" key is not released after use, it automatically snaps back to normal when the handset is replaced in the cradle. Instrument furnished complete with 9-conductor cord. Used as a main-line telephone, with ringer boxes AO-28 and AO-29, or one ringer box AO-27 (which contains two ringers); or with one auxiliary apparatus box (AO-67) and two existing ringer boxes (ringers and condensers only being used). Or, may be used with auxiliary apparatus box only, as an extension telephone.
