

APPARATUS CATALOG CODE BOOKS

TELEPHONES SECTION A27

EXCEPT K500 SERIES SEE A3

Scanned from a Current Code book (last updated July 1960) and an Obsolete Code book (last updated April 1946) issued by the engineering department, Kellogg Switchboard and Supply Company. The information for each section from both books has been combined under the same heading in these PDF files. Since the books are not matched up as to date there will be some missing information, when researching an item be sure and look in both books' index for the section. The current code book index also lists all the obsolete items through 1960 whereas the obsolete book index lists only items through 1946. Some files also contain charts or other supporting information to aid the researcher.

After scanning these and reviewing them for the PDF bookmarks I believe the scheme of things to be this; in the bookmarks the "Telephone" section is for wall mount wood and metal sets including desk boxes. The "1000 series" for the redbar phones. The "Index D. S. etc" for desk sets (sticks, Grabaphones etc), bracket (spacesaver) and the Master Phones. The reason for this appears to be that code numbers for various types of sets were reused in the different lines until the 700 series came along and model numbers (700, 900, 1000, K500 etc.) were adopted. This is broken down even further in the Obsolete Book as shown by the PDF bookmarks.

The Obsolete Code book pages were all reproduced with a spirit duplicator (Ditto) on non-acid free paper and have faded and yellowed (some worse than others) considerably so the scans are not consistent, therefore you will detect some PhotoShop editing to enhance the readability of some sheets. The Current Code book was reproduced by lithography and is much more consistent and readable.

**ORIGINALLY IN THE COLLECTION OF CHARLES PLEASANCE AND FURNISHED FOR SCANNING BY
KEITH CHESHIRE FROM HIS COLLECTION**
